## Software Advantages:

#### 4 & 7-COLOR IMAGING

The innovative 7-color imaging dual-energy technology is an advance material classification system which enables operator to view screened objects in 7 colors, each color correlate to a specific range of atomic number. It colors the 3-Kerosene with RED, hence easier to detect threats.

Combine with the Zeff-scan function to auto-highlight the potential threat of explosive and narcotic (Zeff 7.8.9) on X-ray image in real time during scanning process according to the characteristics range of explosives and narcotics atomic number (Zeff 7.8.9), which help to identify the suspicious material more effectively.

\* 1-Water, 2-Alcohol, 3- Kerosene, 4-Edible Oil,5-Liquified Natural Gas, 6-Antibacterial Hand Gel

#### DUAL-ENERGY CLEAR IMAGING & SPLIT-SCREEN TECHNOLOGY

Dual-energy supports to identify then display the objects concealed in bag in the specific color according to their atomic number, the metallics (guns, bullet, knife) can be seen in blue, the organic (plastic, cloth, currency) can be seen in orange.

It also supports multiple Split-screen and Full-screen options for optimal viewing, operator can customize the color mode of the switchable main screen and auxiliary screen respectively

#### Software Advantages:

The software is to control the X-RAY baggage scanner as well to acquire and process the X-RAY image with different tools to find the potential threat, all the tools can be controlled by Exclusive Control Panel.
