

RAPID DEPLOYMENT ANTI CRASH/ANTI RAM BARRIER

VV-VM1000-ARJ8 ANTI RAM BARRIER

FEATURES

Designed to resist vehicle impact with full immobilization & penetration repulsion

Tool free rapid deployment suitable for various sites and security zones

Crash rated protection to neutralise high speed vehicle attacks

Preserves roads and pavements with no ground-anchoring design

IP68 Weatherproof rated for outdoor durability

Optional cabinets for storage space optimization, logistics management and equipment protection

Crash Tested

No Ground Anchoring

Tool-Free Deployment

Durable Material

IP68
Weather Proof

TECHNICAL SPECIFICATIONS

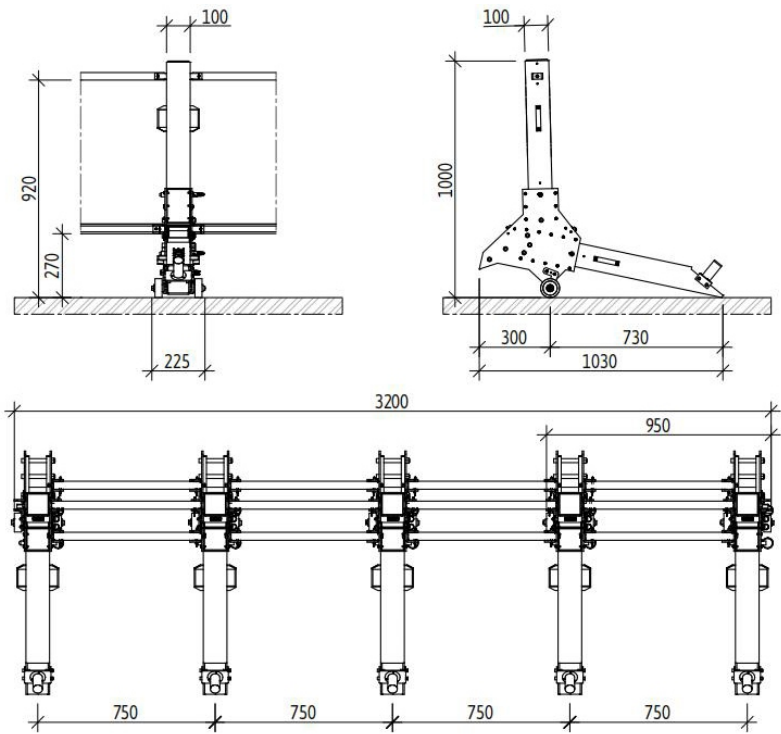

VV-VM1000-ARJ8

Parameter	Specifications
Material	High density-carbon steel
Dimensions (Single Unit)	100 (H) x 9.5 (W) x 105 (D) cm
Inter-Unit Distance	80 cm
Colour	Red (customizable)
Barricade Width	Multi-module configuration supported as per deployment requirement
Ingress Protection (IP) Rating	IP68
Deployment Method	Portable, manual, tool-free
Installation	Quick deployment < 5 minutes per module
Working Temperature	-40°C ~ 70°C (recommended)
Working Humidity	≤95% non-condensing humidity

*Exact products and specifications shown may vary by geographic region and are subject to change without notice. Product Image, weights and measurements are approximate and may vary.

DIMENSIONS

Unit: mm

ANTI-COLLISION PERFORMANCE

Vehicle Type	Weight	Impact Speed	Impact Angle
Truck	7.5 T	48 km/h	90°
Van	2.5 T	64 km/h	90°
